HD MEDICAL DEBUTS HD STETH™ SMART STETHOSCOPE AT ARAB HEALTH

- HD Steth Offers First Smart Stethoscope with Integrated EKG -

Dubai, UAE – January 29, 2018– At Arab Health, [HD Medical Inc.](#) will debut and demonstrate [HD Steth](#) the only Smart Stethoscope featuring an integrated EKG for instant and accurate cardiac diagnosis. For the first time it is possible to concurrently detect ischemic, electrical, structural and mechanical heart functions in real time to deliver superior quality auscultation, the Gold Standard in Cardiac Care™.

HD Steth transforms the way medicine is practiced at the point of care with real-time Bluetooth transmission and visualization of cardiac waveforms on a smart phone. Patient data can be transmitted via the cloud to a cardiologist for diagnosis which the medical practitioner can then utilize to prescribe the optimum treatment. Patient data can also be captured and shared with other doctors, insurance companies and standard electronic medical record systems. HD Steth enhances care, saves time and improves outcomes.

“HD Steth uniquely performs Mobile Cardiac Monitoring™ ideal for market applications including Triage, Screening and Monitoring, Digital and Home Health, among others,” said Arvind Thiagarajan, Founder and CEO of HD Medical. “To serve these markets, we are actively building our distribution channels for HD Steth worldwide as we receive tremendous market response.”

HD Steth is currently available outside the U.S., with FDA certification anticipated by early Q3 2018. HD Medical is presently recruiting distributors plus partnership and strategic relationship opportunities worldwide.
