**HD MEDICAL DEBUTS VISCOPE MD WORLD'S FIRST VISUAL STETHOSCOPE WITH
MURMUR DETECTION AT MEDICA**

- Groundbreaking Stethoscope Employs Patented Murmur Detection Algorithm -

Düsseldorf, Germany – November 20, 2013 – Today at MEDICA in Hall 16 / A05, [HD Medical Inc.](#) debuts its groundbreaking visual stethoscope [ViScope MD™](#) featuring the world's first murmur detection indicator. This revolutionary stethoscope offers a unique [integrated visual display](#) that lets medical professionals perform dynamic auscultation™ and “see” the heart beats they hear in real-time visual waveforms. ViScope MD has the ability to save heart sound waveforms which can be transferred to a computer for patient records and analysis with the caliper and zoom functions in the bundled [software](#).

The ViScope MD visual display is complemented by superior high fidelity sound quality for unmatched clarity. The scope has a tunable filter that provides the ability to select specific parts of the heart sound to listen to, such as S1/S2, S3/S4, murmurs, etc. HD Medical has invested over a decade refining its proprietary noise reduction technology.

“Our visual stethoscopes are uniquely capable of addressing today’s evidence based medical environment,” states Arvind Thiagarajan, the company’s Founder and Chief Inventor. “ViScope and ViScope MD are the industry’s first stethoscopes that enable documentation of heart data which can be used for patient reporting and analysis as well as information sharing or for use in teaching situations.”

ViScope MD with murmur detection is sold in India directly from the [website](#) and through HD Medical’s network of resellers. ViScope without murmur detection has been awarded the US Food and Drug Administration (FDA) 510 (K) clearance and is undergoing certification for CE compliance. ViScope is sold directly from the [website](#) and through HD Medical’s network of resellers in the USA and Europe.
